

CLK-BD-8285-AC5X

Baldwin® Soho Wireless Deadbolt w/ infiNET EX®, No Keypad

Baldwin® wireless deadbolts are a stylish, convenient addition to the modern home. Featuring infiNET EX® wireless communications, they can be integrated with a Crestron® control system, allowing doors to be locked and unlocked from any touch screen in the house, or remotely using your computer or mobile device. Simply unlocking the front door can also turn on the lights, open the window shades, adjust the thermostat, and play your favorite music. You can even receive a text or email showing when a door has been locked or unlocked.

The CLK-BD-8252-AC5X is a motorized single-cylinder deadbolt featuring wireless communications. Available in different designer finishes, it comes as a complete lockset, with a trim ring for the exterior of the door. Besides remote operation, locking or unlocking the deadbolt is easily done by a keyturn from the outside or a thumbturn from the inside.

Optional handleset kits add a finishing touch to the deadbolt installation. For a stylish front-door solution, the CLK-BD-8252-AC5X can be used with a matching 3/4 Escutcheon kit (sold separately). A sectional entry handleset kit, CLK-BD-85386-ACLHRH, is also available (sold separately).

infiNET EX

Ultra-reliable infiNET EX wireless technology provides steadfast two-way RF communications throughout a residential structure without the need for physical control wiring. Baldwin wireless deadbolts work together with other infiNET EX devices like our Cameo® Wireless In-Wall Dimmers and Keypads, communicating with a Crestron® control system via an infiNET EX Wireless Gateway^[1]. Up to 100 infiNET EX devices may coexist on a single infiNET EX network.

Security & Privacy

The deadbolt can be managed through a Crestron touch screen, enabling you to remotely control and view the status of the deadbolt. In addition, pre-programmed settings can route text and email alerts to mobile devices, such as cell phones, whenever a door is used.

- > *Motorized deadbolt with designer finishes*
- > *infiNET EX® wireless communications for easy integration into a Crestron® control system*
- > *Remotely lock and unlock doors using touch screens, remotes and mobile devices*

Notes:

1. Wireless gateway(s) sold separately. The infiNET EX network employs a mesh network topology employing a single gateway with multiple expanders. Most infiNET EX wireless devices provide built-in expander functionality so that each one effectively extends the range of the wireless network beyond the initial range of the gateway. However, battery-powered infiNET EX devices, including Baldwin wireless door locks, do not provide expander functionality. A dedicated infiNET EX Wireless Expander, model CLW-EXPEX, is also available.
